

Town of Big Lake E911 Sign Installation

Township Ordinance 8 states that an E911 address sign must be installed at the end of your driveway near the road. This will help emergency responders such as police and fire quickly locate your property, as well as mail/package delivery.

The E911 sign is \$30.00. We have available a steel post and hardware for \$10.00, however, you may use your own post and hardware. We can only accept check or cash, checks should be made out to Town of Big Lake. Please follow the guideline below for installation.

Prior to installation, please make sure you get the underground utilities marked. Contact Gopher State One Call at 651-454-0002 or online at GopherStateOneCall.org to set up a line marking ticket.

**Install at the access point to your property (where your driveway meets the road),
with the following guidelines:**

- **The signpost needs to be at least three feet (3') but not more than eight feet (8') from the road edge.**
- **The height of the sign needs to be between four feet (4') and five feet (5').**
